Dear Commissioner Henney,

It has recently come to my attention that the FDA is proposing to irradiate food without labeling the packaging. I believe that people have the right to control what they put into their bodies. I do not want to eat food treated with radiation. I believe the process destroys vitamins, and I do not feel the process has been adequately tested for human consumption. If food is to be irradiated food must be labelled in accordance. Let every consumer decide for themselves what kind of food they want to eat.

Many citizens are unaware of the FDA's proposals and have the right to know when food is irradiated. Please inform citizens of your proposal and ~~will~~ clearly label all irradiated food.

Thank you for your time.

Sincerely,

Liv Leader
